Folks,

We should think about sending someone from the region to get our R1 back.

Ronnie

Subject: Trenton / Enterprise update

OSC met with Enterprise and conducted site walk, oil is bermed next to highway but line is still releasing oil as of Jan 30 at 10:30 pm. Vac trucks and frac tanks on-site recovering product. Enterprise is conducting the cleanup. EPA is evaluating two creeks and conducting air monitoring downwind in a small residential area. Currently, EPA has been advised no creeks have been impacted. Enterprise has CTEH conducting air monitoring. OSC advised CTEH that all workers need respirators in the work area due to high Benzene and VOC levels discovered during site walk next to the spill. HWY 121 is closed to traffic until the road is cleaned. OSC Brescia will be on scene for the next couple of days.
